

Senior Web Developer

- Idyllic Ballarat Location • \$110K package negotiable
- Innovative communications company

If you are a motivated senior .Net developer looking to work on a new complex web site from the ground up, then look no further! This is a fantastic opportunity to work with senior and experienced IT and Marketing professionals who are developing a world first in marketing communications.

On behalf of T garage, JK Personnel is seeking a positive and experienced .Net technical architect with 4-6 years experience. If you want to be at the cutting edge of social networking and new media marketing, then this role is for you!

Ideally you have worked on .Net Content Management architectures and have been the driver for Web development teams.

From your experience as a Senior Web Developer we are looking for ...

- Expertise in application software implementation ideally with commercial .Net experience;
- Database knowledge, including server side programming in either MS/SQL Server or Oracle;
- Skills and knowledge in responsive client side user interface XHTML, XML/XSL, CSS, as well as ASP.NET 2.0+, Ajax, server side ASP; Object Oriented VB.net & ASP.net and Java/Java Servlets.

If you are looking to push boundaries, thrive on working in a dynamic team environment, and have superior analytical and problem solving skills complimented by good communication skills, then we look forward to receiving your application.

Contact Krys Pekin at JK Personnel on (03) 5332 9955 for further detailed information.
